

SMART INDIA HACKATHON 2026

Problem Statement ID - SIH25082

Problem Statement Title - Development of a travel related software app that can be installed on mobile phones that could capture trip related information

Theme - Travel & Tourism

PS Category - Software

Team ID -

Team Name - Safnora

PROBLEM STATEMENT

SIH25082 - Development of a travel related software app that can be installed on mobile phones that could capture trip related information

PROBLEM:

Travel information is often scattered across multiple platforms:

- ✓ Trip plans and itineraries
- ✓ Places and routes
- ✓ Group discussions
- ✓ Expenses and settlements
- ✓ Photos and videos
- ✓ Notes and memories
- ✓ Tickets and travel documents

EXISTING CHALLENGE:

- ✓ There is no single, group-centric space where the entire journey can be planned, managed, experienced and preserved together.

SAFNORA addresses this gap through a unified collaborative travel platform.

THE PROBLEM WE IDENTIFIED

What Happens During a Group Trip?

- ✓ WhatsApp: Group Discussions
- ✓ Google Maps: Places & Routes
- ✓ Notes: Itinerary
- ✓ Split-wise: Expenses
- ✓ Gallery: Photos
- ✓ Cloud Storage: Documents & Photos
- ✓ Instagram: Memories

Result

- Information gets scattered
- Decisions get lost in conversations
- Expenses are difficult to track
- Photos are distributed across members
- Trip history is incomplete
- No single source of truth for the trip

SAFNORA brings everything together.

OUR SOLUTION

SAFNORA - One Digital Space for the Entire Journey

A mobile-first collaborative travel platform where a group can:

- ✓ **PLAN**
 - Create trips, add destinations and build itineraries.
- ✓ **COLLABORATE**
 - Invite members, vote on decisions and contribute to the trip.
- ✓ **MANAGE**
 - Track expenses, bookings, documents and tasks.
- ✓ **EXPERIENCE**
 - Capture places, photos, videos, notes and moments.
- ✓ **REMEMBER**
 - Preserve the complete journey as a digital trip history.

HOW SAFNORA WORKS

FEASIBILITY & VIABILITY

Technical Feasibility

- ✓ React Native enables a single cross-platform mobile application.
- ✓ Firebase Authentication provides secure user authentication.
- ✓ Cloud Firestore enables real-time synchronization of trip data.
- ✓ Firebase Storage handles photos, videos and travel documents.
- ✓ Firebase Cloud Functions manages backend business logic.
- ✓ Firebase Cloud Messaging enables real-time trip notifications.
- ✓ Google Maps / Places API supports destinations, routes and location-based features.
- ✓ Serverless Firebase architecture enables rapid development and incremental scaling.

TECH STACK

Mobile Application

- ✓ React Native
- ✓ TypeScript
- ✓ Responsive & cross-platform mobile experience

Firebase Backend

- ✓ Firebase Authentication — User authentication
- ✓ Cloud Firestore — Trips, groups, itinerary, expenses & memories
- ✓ Firebase Storage — Photos, videos & documents
- ✓ Firebase Cloud Messaging (FCM) — Push notifications
- ✓ Firebase Cloud Functions — Backend business logic & automation

External Services

- ✓ Google Maps / Places API — Locations, places & routes
- ✓ Geolocation Services — Trip/location tracking

IMPACT & BENEFITS

Social Impact

- ✓ Better group coordination and communication
- ✓ Collective decision-making through polls
- ✓ Shared memories contributed by every member
- ✓ Transparent and fair expense sharing

Economic Impact

- ✓ Centralized expense tracking and settlement
- ✓ Better visibility of total trip expenditure
- ✓ Reduced dependency on multiple travel-management applications
- ✓ Supports future integration with travel service providers

Environmental Impact

- ✓ Digital storage of tickets, receipts and travel documents
- ✓ Reduced dependency on printed travel records
- ✓ Digital-first travel documentation

RESEARCH & REFERENCES

Rhyme

- ✓ Studied for destination discovery, maps, itinerary planning and collaborative trip planning.

Wanderlog

- ✓ Studied for itinerary management, maps, group collaboration, budgeting and expense management.

Stippl

- ✓ Studied for trip planning, budgeting, expenses, travel tracking and travel journaling.

Trips Together

- ✓ Studied for group planning, voting, shared itineraries and expense management.

TripProf

- ✓ Studied for group trip management, itinerary, expenses, documents and memories.

NomadCrew

- ✓ Studied for group coordination, chat, polls, live location and expenses.
